Randall Made Knives

From Wikipedia, the free encyclopedia

Randall Made Knives, usually referred to as Randall, is an American custom handcrafted knife manufacturer founded by Walter Doane "Bo" Randall, Jr. in the U.S. The knife making shop and showroom is located in Orlando, Florida. Randall began making knives as a hobby in 1937. His son and grandson continue the family trade along with 20 craftsmen producing about 8,000 knives per year out of a shop on South Orange Blossom Trail.

Randall offers 28 models of knives for different applications, each customizable at the factory based on customer specification. Randall hand forges nearly all models of knives instead of using factory stamping or stock removal, one of few manufacturers to do so. Randall uses a 17-step process for making knives, which usually takes over 8 hours to complete. The waiting list for obtaining a Randall from the shop is typically six years.

Two examples of Randall's Model 17 "Astro", designed for the use of astronauts, are on display in the Smithsonian Institution. The company operates its own museum containing more than 7,000 knives and other edged weapons, including one of the world's largest collections of pocket knives.
